8BitMMO Steam Founder's Pack Deluxe Crack Gamehackstudios

Download ->>>>>> <http://bit.ly/2SMQ1yZ>

### About This Content

Get a jump-start into 8BitMMO and support development with this pack! Receive 5,040 gold and 36 platinum as well as two exclusive hats: the first is made of steam, the second made out of OTHER HATS.

## 8BitMMO Steam Founder's Pack (Basic & Deluxe) Includes:

### Founder Gold Bonus

Get a jump start into gameplay with gold! Note: gold is specific to a particular server shard / character you are playing on. Your gold will be credited to the most recent server shard you have played on (or if you have not played yet, then the first shard you play on)

- Basic includes: **2,100 gold**
- Deluxe includes: **5,040 gold** (20% extra gold)

### Founder Platinum Bonus

You get a bundle of platinum! Platinum is not server shard specific, and so it is easily accessible from any server. Use your platinum for advanced building tasks, for instance purchasing your own permanent land via a town stone.

- Basic includes: **15 plat**
- Deluxe includes **36 plat** (20% extra plat)

### Exclusive Founder Steam Hat

It's a hat made of *steam*. See what I did there? ... I'll see myself out.

### Exclusive Founder Deluxe Steam Hat (Deluxe ONLY)

I heard you guys like hats! So I made a hat on top of a hat. BAM! And then I put a fishbowl on top of that. And then I put a Northwestern Muscovy Water Fowl on top of that. And then I gave the duck a hat because HATS!

### Be a part of development!

Engage in the community development by posting your ideas to the game's suggestion box. Many top ideas have been implemented into the game. Free updates with new content and features are frequently released.

After you have purchased a Steam Founder's pack, please restart the game launcher for the game to detect the purchase.

Genre: Action, Adventure, Free to Play, Indie, Massively Multiplayer, RPG  
Developer:  
Archive Entertainment  
Release Date: 26 Jan, 2015

a09c17d780

**Minimum:**

**OS:** Windows XP

**Memory:** 2 GB RAM

**Graphics:** Integrated graphics is fine, or really any wire & tin foil you can cobble together that looks like a GPU.

**Network:** Broadband Internet connection

**Storage:** 200 MB available space

**Sound Card:** If you don't have one, just make beep & boop noises with your mouth when appropriate.

**Additional Notes:** You can probably get this to run on a toaster.

English,German,Japanese
