The company offers SolidWorks, SolidWorks VSI, Solid Edge, Product Lifecycle Management (PLM), Dimension, ARES, DesignSpark, SolidWorks Virtuoso, and Networked Solutions. The company serves engineering and design firms, global manufacturers, contractors, and distributors. It operates in seven geographic regions and has a strong presence in Europe, the Americas, and the APAC region. Dassault Systèmes SOLIDWORKS Corp. was founded in 1989 and is headquartered in Waltham, Massachusetts. – Dassault Systèmes has indicated that it plans to release another set of updates to its products over the next few years, ranging from new features to product design improvements. – These improvements are expected to address user needs and improve the customer experience, while increasing efficiency and improving productivity. The fifth release in its line of updates, V10.2, is scheduled to be released in Q4 2015, approximately three months after V10.1. Dassault Systèmes also released an updated "Time Planning" timeline tool, allowing customers to plan and track workflows for engineering design projects in seconds, instead of hours or days. The current version, V10.2, will be supported for three years, after which customers will have the option to upgrade to a new release. The fifth release in the product line, V10.2, will be released in Q4 2015, three months after the release of V10.1. "Version 10.2 will come a little more than three months after release of V10.1," noted Peter Fackler, director of product marketing, Dassault Systèmes SOLIDWORKS Corp. "The purpose of the release is to address some of the questions that customers have with the release and prepare them for another release in the next 12-18 months." SolidWorks VSI was the most recent addition to Dassault Systèmes SOLIDWORKS Corp.'s product line, introduced in July 2014. "VSI" was an acronym for virtual simulation, which the product provided. The product added functionality that allowed users to create virtual models of assemblies of parts, in order to generate data used for analysis, such as stresses and loads. SolidWorks VSI will be supported for 18 months, and then it will be retired from Dassault Systèmes' portfolio. "It's easy to come up with new 82157476af
